A Message from our Health Director

She:kon (and other greetings)!

Welcome to the COO Health Spring Newsletter. I would like to take the time to thank everyone who joined us for the Distinction Based Indigenous Health Legislation Forum held on February 27, and the 17th Annual Health Forum Our Time, Our Health: Time to Reconnect, Restore, and Refocus, held on February 28 to March 2 both in-person in Toronto, ON, and virtually. It was our first in person health forum, since the pandemic, and it was very well attended with 350 people joining us in-person, and 50 joining us virtually. Although many people stated how glad they were to be back in-person after being apart for so long, the virtual option was helpful for our presenters who were unable to join us for all 3 days. We had amazing keynote speakers, workshops and entertainment in attendance over the 3 day period, including a keynote speech on Physicians Addressing Racism by Dr. Saroo Sharda and Dr. James Makokis. Workshop topics included wellness for first responders, food security, Indigenous knowledge and mental health and addictions. While some enjoyed a night of painting with Moses, others were treated to a social with cultural performers and participated in an impromptu pow-wow fitness. Our agenda is determined by the responses to the call for abstracts, as so many of our communities are doing amazing things that can be shared with other communities. I'd like to thank everyone who joined us, whether as a participant, observer, workshop presenter, youth, elder or keynote speaker, you helped make the 17th Annual Health Forum a resounding success! I'd also like to thank all of the COO Health Sector Staff for doing an amazing job this year - and every year!

Niawen/Thank you,

Tobi Mitchell, COO Director of Health

Health Forum 2023

February 28, March 1 & 2, 2023

Toronto, ON

The 17th Annual Health Forum was presented in a hybrid model, via in-person and virtual platform, on February 28 – March 2, 2023. We had an excellent response with over 350 individuals registering to participate in person, and approximately 50 virtually. The theme of the Forum was “Time to Reconnect, Restore and Refocus. The agenda created an excellent balance of research and community stories on a variety of topics as we begin resetting health policies and priorities in a post-pandemic environment.

Health Forum 2023

Toronto, ON

Meet Our Newest Staff Member!

Frances Pine

Project Lead:

Health Human Resources Strategy

Frances Pine is from Serpent River First Nation and has taken on the role as the Project Lead for the Health Human Resource Strategy with the Chiefs of Ontario. Frances will be working with the First Nations to identify gaps and solutions to address issues affecting health human resource capacity. Previously, Frances worked in a variety of Indigenous Organizations in a Program Coordinating capacity, such as the Dan Pine Healing Lodge Coordinator, a Case Manager with Ontario Aboriginal Housing Services and with the Metis Nation of Ontario, and as the FASD Coordinator for both Noojmowin Teg Health Services and Maamwesying North Shore Community Health Services, Inc.

Health Human Resources Strategy

Frances Pine – Frances.Pine@coo.org

Frances Pine, who is from Serpent River First Nation and has worked prominently in the Social Services, Health and Education fields, including in the FASD/Neurodevelopmental field, has accepted the role as the Project Lead for the Health Human Resource (HHR) Strategy with the Chiefs of Ontario as of May 2023. Over the next few months, she will be working with the First Nations, PTOs, and fellow Chiefs of Ontario cohorts to identify gaps and look for possible solutions to address issues affecting the current Health Human Resources within communities. The following "5 Step Communications Process" will be used to develop the HHR Strategy:

1. Surveys will be sent to First Nations, Tribal Councils/AHACs and PTOs by the Chiefs of Ontario's Health, Social Services, Education and Economic Development Sectors to gain valuable feedback for the current snapshot of the HHR Strategy, in comparison to the HHR Strategy from 10 years ago.
2. The creation of a Task Force that will be made up of representation from the 3 regions in the province (Thunder Bay, Sault Ste Marie and Toronto) and the Health, Social Services, Education and Economic Development Sectors at COO that will all affect and give clear direction to the HHR Strategy.
3. Working directly with PTOs and Independent First Nations in developing the HHR Strategy.
4. Compile all information and, under the direction of the Task Force, develop both the HHR Strategy and additional resources to assist in implementation and enhancement at all levels and all COO Sectors within communities.
5. Present the HHR Strategy and additional resources to the communities and potentially provide training on the strategy itself.

If you have any questions regarding this, please reach out to Frances Pine, at frances.pine@coo.org or via phone at 1-416-200-0299.

Non-Insured Health Benefits Update

Tasha Toulouse - Tasha.Toulouse@coo.org

Dental Benefit Information

NIHB has made changes to predetermination and frequency guidelines for dental services. NIHB has removed the predetermination requirement for coverage of the following:

- Surgical tooth extractions;
- Prefabricated posts;
- First placement of a standard complete denture;
- Replacement is already covered without predetermination within frequency guidelines; and
- Standard root canal treatments, also covered without predetermination, are no longer subject to program frequency guidelines.

Reminder: Submitting Dental Appeal Documents

If you are denied NIHB coverage of a dental or orthodontic service, the decision can be appealed by the client, a parent or legal guardian, or a client representative. Clients can submit appeal requests online or by mail.

- Online submission: Clients will need to create a secure web-based account on the Express Scripts Canada NIHB provider and client website (<https://nihbssna.express-scripts.ca>)
- Mail submissions: Label your envelope "APPEAL—CONFIDENTIAL" and mail it to the NIHB Dental Predetermination Centre, using the address for either dental or orthodontic services, as outlined below:

Dental Predetermination Centre (orthodontic services)

Non-Insured Health Benefits

Address locator: 1902C

Ottawa ON K1A 0K9

Dental Predetermination Centre (dental services)

Non-Insured Health Benefits

Address locator: 1902D

Ottawa ON K1A 0K9

If you are submitting an appeal through your online web account, **upload only documentation pertaining directly to your appeal**. Any other information submitted through the appeal web page, such as client reimbursement claims, will not be processed.

Services identified as exclusions under the NIHB Program will not be considered for appeal. If you have questions or would like support with the dental appeal process, you can contact the NIHB Dental Predetermination Centre or a COO NIHB Navigator.

Non-Insured Health Benefits Update

Brenda Owl - Brenda.Owl@coo.org

NIHB Program Update April 2023

Diabetics who manage their condition with Insulin may now be eligible for coverage for the continuous glucose monitoring (CGM) systems such as Dexcom G6, FreeStyle Libre and FreeStyle Libre 2.

Avian Flu Update

linda@coo.org

Reference: Indigenous Services Canada Fact Sheet

Avian influenza (H5N1) has been confirmed in birds in Canada - in all 4 Atlantic provinces, Ontario and B.C., and in poultry in Nova Scotia and Newfoundland. The associated risk to food security and the health of Indigenous Peoples has led to the need for increased awareness and educational materials. Indigenous Services Canada has provided a question and answer fact sheet

Q&A

Q: What is Avian Influenza?

A: Avian influenza (AI) is a viral infection that is highly contagious among birds and is found in domestic poultry and wild birds including raptors, gulls, terns, shorebirds, ducks, geese, cranes and swans. Wild birds and waterfowl in Canada and throughout the world are natural carriers of avian influenza viruses. These viruses typically cause little or no harm to most waterfowl and some wild birds, but may cause severe illness in some species. They can also spread to domestic poultry and, under certain circumstances, to people. There are many AI virus strains, which are usually classified into two categories: low pathogenic (LPAI) strains, which usually cause mild or no clinical signs in poultry and highly pathogenic (HPAI) strains, which can cause severe disease, accompanied by potentially high mortality rates among poultry.

Q: What is the risk to humans?

A: The risk of HPAI (H5N1) infection in the general public is considered low. There is no evidence to suggest that the avian influenza virus can be transmitted to humans through the consumption of fully cooked game birds or eggs. In general, human cases of avian influenza are caused by close, prolonged contact with infected live or dead poultry or contaminated environments. While the risk of human infection with avian influenza viruses is low, individuals should be cautious when handling wild birds. Globally, since January 2003, there have been 863 cases of human infection with avian influenza (H5N1) virus reported from 18 countries, however, only 3 human infections have been reported since 2020 (WHO). Approximately 92% of confirmed cases and deaths from H5N1 have occurred in five countries - China, Egypt, Indonesia, Thailand, and Vietnam. (Public Safety Canada

<https://www.publicsafety.gc.ca/cnt/rsrscs/pblctns/nml-pndmc-nflnz/index-en.aspx>)

Fortunately, recent strains of H5N1 seen in North America appear to be less likely to infect humans and the risk of infection in the general public is considered low (US CDC

<https://www.cdc.gov/flu/avianflu/spotlights/2021-2022/h5n1-low-risk-public.htm>).

Avian Flu Update

linda@coo.org

Q: What are precautions that the general public can take?

A: As a general guideline, members of the public should not handle dead wild birds or live birds that are acting strangely. If contact with wild birds is unavoidable:

- Wear any available personal protective equipment (PPE) on hand (i.e. gloves, mask, eye protection)
- Pick up carcass with gloves or use a doubled plastic bag • Avoid contact with blood, body fluids and feces
- Wash your hands thoroughly with soap and warm water If you observe sick or dead birds and suspect that disease may be involved, contact your local Conservation Officer or the Canadian Wildlife Health Cooperative at 1- 800-567-2033.

Q: Can I feed wild birds?

A: Do not feed wild birds by hand.

- Feeders at or near poultry operations / domestic animals should be removed
- Backyard bird feeders and baths should be cleaned regularly using solutions of 25ml bleach to 2L water (1:80 dilution), rinsed and let dry

Q: What are precautions that hunters should take?

A: It is considered safe to hunt, handle, and eat healthy game birds. However, because exposure to avian influenza can occur when handling wild birds and waterfowl, we recommend that you:

- Avoid hunting game birds and waterfowl in areas where an outbreak of avian influenza has been reported or where sick or dead birds are found. Before you hunt, check that restrictions in your area have not changed.
- Do not handle or eat sick birds or birds that have died from unknown causes.
- When handling or cleaning game:
 - o Minimize direct contact with blood, feces, and respiratory secretions of all wild birds
 - o Always work in a well-ventilated environment

To find out if an AI outbreak has occurred in your area, contact your local provincial or territorial wildlife management office. Maps are available to show locations where AI has been detected in wild birds and poultry in North America:

<https://www.usgs.gov/media/images/distribution-highly-pathogenic-avianinfluenza-h5-and-h5n1-north-america-20212022>

The World Organization for Animal Health (OIE) also provides a useful map with more details:

Distinctions Based Indigenous Health Legislation

lily@coo.org

The Chiefs of Ontario (COO) continues to support information coordination and dissemination to our member First Nations regarding the proposed Distinction-Based Indigenous Health Legislation introduced by Prime Minister Justin Trudeau and managed through Indigenous Services Canada (ISC).

COO hosted a Joint Dialogue Session on February 27, 2023 with the Assembly of First Nations, ISC, and First Nation Leadership and Health Directors. Copies of the PowerPoints and meeting materials are available on the COO Health Portal.

On April 19th, COO responded to a request from Kasabonika for further details about DBHIL, and met with their respective Leadership and Health Teams.

Upcoming sessions include Assembly of First Nations on May 30 to June 1st which our Ontario Regional Chief Glen Hare and Ontario Chiefs Committee on Health Chair Nigonabe will Co-Chair to discuss how the voices of our First Nations in Ontario – and Canada – must be properly addressed and respected.

First Nations Digital Health

lily@coo.org

First Nations Digital Health Ontario (FNDHO) is an arms-length body of COO that has supported and responded to the demonstrated need for the expansion of virtual health care and digital health care systems in Ontario. This includes community electronic medical records (c-EMRs), tele-medicine, on-reserve and remote services.

Technicians will be meeting in Sault Ste. Marie, ON, from May 9-11 to explore further opportunities to address the critical and unique needs of First Nation citizens.

First Nations Youth Led Suicide Awareness and Prevention Training

Alexxis.Kydd@coo.org

As a follow-up to the Stories from our Roots (SFoR) Youth Life Promotion Project (concluded in March 2020), initial conversations between the COO Health and Youth Sectors have taken place to discuss the development of a proposal for a First Nations Youth Lead Suicide Awareness/Prevention Training as an alternative to SafeTalk®.

During the initial launch of SFoR, SafeTalk® was used to provide suicide prevention training to participants. This training is used all over the world to teach individuals how to recognize suicidal behaviors, and how to take action in a good way. It is considered to be a “community gatekeeper” training; a type of training that prepares key members of the community (i.e., youth) to be able to recognize the signs and symptoms of distress and suicidal behavior of others, how to talk with them, keep them safe and connect them to resources and supports when needed.

While many SFoR participants found the inclusion of this training to be a valuable piece, they also expressed the need for a suicide prevention/awareness training that is specific to First Nations Youth to replace SafeTalk®. A First Nations Youth-specific suicide prevention/awareness training developed by and for First Nations Youth will best reflect their realities and their priorities in addressing the alarmingly high rates of suicide seen in First Nations Youth populations across Ontario.

Progress on this initiative was interrupted due to the COVID-19 pandemic, and vacancy of the COO Youth Coordinator position. However, work has begun on a proposal for funding to develop this First Nations Youth Suicide Prevention/Awareness training curriculum that will then be used to expand the Stories from our Roots Life Promotion project. Further conversations and engagement with Youth across the region will follow as it is imperative they be central to the development of this training. The Ontario First Nations Young Peoples Council (OFNYPC) has also been engaged to participate in this development, and to help determine the needs of Ontario First Nations Youth as it relates to suicide awareness and prevention.

This process will not only allow for First Nations Youth to build skills and capacity in life promotion/suicide awareness and prevention, but will also result in tangible, culture-based training that can be used as a stand alone training opportunity in communities to help understand, recognize and address suicidal behaviors in First Nations Youth. This training will also be used to expand the Stories from our Roots Life Promotion Project to re-launch in a new and improved way.

Mental Health Systems Performance Measurement Report

bernadette@coo.org

ISSUE

The Final Report for the Mental Health Systems Performance Measurement Project is complete and now publicly available. This Final Report completes the project introduced in the Interim Report that was released in November 2021.

BACKGROUND

The Mental Health System Performance Project was conducted in response to a request made to the Institute for Clinical Evaluative Sciences (ICES) by the Mental Health and Addictions Working Group under the Trilateral First Nations Health Senior Officials Committee (TFNHSOC) in March 2018, to replicate an Ontario Mental Health Scorecard using First Nations identifiers for ages 6 to 105 years. It examines rates of service use for a number of Mental Health and Addictions (MHA) indicators for First Nations people, compared to those for non-First Nations people and to Ontario overall. This is the first project to assess MHA-related performance indicators and factors among First Nations in Ontario. Indicators are categorized under System Use, Access to Care, and Outcomes. The findings on System Use indicators were presented in the Interim report from November 2021.

CURRENT STATUS

The Final Report, including Access to Care and Outcomes, has been prepared by the Chiefs of Ontario as a "Peoples' Report," which provides context to the data presented in a user friendly format. There is also a distinct Executive Summary report. Both reports have been prepared collaboratively by the COO Health Sector, the Research and Data Management Sector, the Steering Committee, and ICES. There is also an accompanying Technical Report (Chart Packs) prepared by ICES which provides aggregated data only. The Peoples' Report and Executive Summary will be made available publicly online through the COO Health Portal following its release to Health Directors and First Nations Leadership.

As stated above, the Technical Report (Chart Packs) contains aggregated data charts only, without context. In order to mitigate risks that these could be used by researchers or others and interpreted in ways that could increase stigma and harm, particularly sensitive data on Prenatal Opioid Exposure, Intentional Self-Injury, and Death by Suicide, the Technical report (Chart Packs) will be released only by request to the COO Health and Research and Data Management Sectors, which will then be vetted by application process through the First Nation Data Governance Committee (DGC) within the COO Research and Data Management Sector.

Mental Health Systems Performance Measurement Report

bernadette@coo.org

A number of recommendations for policy and program improvements are provided within the Executive Summary (p.7) and the full report (p.71). The COO Health Sector is hopeful that the results and recommendations evidenced in this report can be used by communities to assist in prioritizing program and policy planning, as well as an advocacy tool for improvement in funding and supports for services required by First Nations.

NEXT STEPS

1. The Final Report and Executive Summary will be released to all First Nations Leadership and community Health Directors, followed by a public press release.
2. The Technical Report will be held by COO. A discussion between the Health and Research and Data Management Sectors, and the First Nations DGC is required to consider waiving the fee of \$1,500 (as set out in their Terms of Reference) for data requests by First Nation communities to allow access to the Technical Report.
3. Leadership are encouraged to review and share this report's findings and recommendations with their communities, Political Territorial Organizations and other relevant political and health affiliates.
4. Leadership and Health Directors are encouraged to use this report's findings and recommendations to support their on-going advocacy for improvements in community-based health services, funding, and access to equitable treatment for their citizens in the provincial health system, including additional resources and training in Health Human Resources, timely psychiatry services for Children/youth, midwifery, Trauma-informed training, harm reduction measures, virtual care access and addressing systemic racism.

The Executive Summary and Final Report will be posted to the

Improving access to healthy food

A NEW INTAKE OF THE LOCAL FOOD INFRASTRUCTURE FUND IS NOW OPEN

The **Local Food Infrastructure Fund (LFIF)** supports community-led projects that **strengthen food systems and help to facilitate access to safe and nutritious food** for at-risk Canadians. It was created as part of the Government of Canada's Food Policy for a **healthier and more sustainable food system** in Canada.

Through **Budget 2023**, **LFIF** has received an additional \$10 million to **help increase food security in communities across Canada**. The new application intake for this funding provides rapid-response grants to **help prevent hunger through investments in infrastructure needs**.

Eligible applicants must be capable of entering into a legally-binding agreement and are:

- Not-for-profit organizations that have been in operation for at least **two years** as a legal entity;
- **Indigenous** (First Nation, Métis, and Inuit); or
- **Municipalities and Regional Governments**.

Eligible projects must be:

- simple infrastructure requests with a **targeted and immediate impact to improving access to local and healthy foods** for Canadians at risk of food insecurity;
- funding requests between **\$15,000 and \$120,000**; and,
- completed by **March 31, 2024**

Applications will be accepted from **May 4 to May 31, 2023**, depending on funding availability.

Learn more or apply.

TRAINING OPPORTUNITY

Building Good Relations: *Essential Counselling Skills for Helpers*

MAY 24 & 25

9:30 am - 3:30 pm EST

Due to popular demand, we're happy to announce a second pilot workshop of Building Good Relations: Essential Counselling Skills for Helpers. Space is limited to 80 registrants. If you are registered for the June 1-2, 2023 workshop, please do not register again.

Building Good Relations is a two-day online interactive workshop that provides helpers with an opportunity for hands-on practice of foundational skills for counselling and helping work, including: helper self-awareness, simple and complex reflection, goal setting, setting boundaries, exploratory questions, empathetic validation, instilling hope, and safe self-disclosure. Training participants will work together in groups of three to practice the skills while providing constructive peer feedback.

WHEN: May 24-25, 2023

TIME: 9:30 am - 3:30 pm EST

WHERE: Zoom

INTENDED AUDIENCE: This training is intended for Ontario-based Indigenous helpers and workers who provide direct services to First Nations, Inuit, and/or Métis. Participants should engage in some form of counselling, coaching, guidance, or support of community members within their role.

Note: This is a pilot workshop. Participants will be asked to participate and provide feedback on the content, structure, and delivery of the workshop

Questions, contact: workforcedevelopment@camh.ca

HEALTH COORDINATION UNIT

The Health Coordination Unit (HCU) is the technical advisory body supported by the coordinating capacity of the Chiefs of Ontario office. It is comprised of the Health Directors of the PTOs, Six Nations of the Grand River and one representative from the Independent First Nations. The Health Coordination Unit is accountable to the Ontario Chiefs Committee on Health (OCCOH), the Leadership Council and the Ontario Chiefs in Assembly. The Health Coordination Unit identifies health issues, prepares briefing papers and develops and recommends health strategies that require political support and action.
